EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Hayes Soloway on 3/3/2005.

The application has been amended as follows: **Cancel claims 7-10.**

2. The following is an examiner's statement of reasons for allowance: The Sato invention was similar to the claimed invention in the sense that both invention set out to maintain the proper gamma correction value when the pixels undergo inversion. Sato's invention can be best understood by referencing figures 5 and 17. The α value is maintained throughout the entire γ shift during a polarity switch. The Sato reference however does not explicitly explain the symmetrical γ -correction voltage relationship that is illustrated in the applicant's figures 4a-4d and 5a-d. The applicant's invention relies on these particular γ -correction curves where as Sato's γ -correction is maintained through maintaining a relative α relationship.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
